

****BEFORE STARTING THIS PROCESS****
 Print this page at 100% and use a ruler to verify the measurements below are correct once printed.

Bracelet Sizing Guide

These measurements are guides only to help you determine size.

DIRECTIONS:

(please watch video available on the bracelet page)

1. Use ruler to verify the printed size is correct.
2. Cut on the dotted lines making sure to cut the ends exactly on the dotted lines.
3. Measure the cutout to verify it is still the size it is supposed to be.
4. With the paper laying flat on a surface, take a piece of tape and place it under one end so that the end of the bracelet touches the halfway point of the tape.
5. Wrap the other end up and around so that the other end now exactly touches the first end and press down on the tape.
6. Fold the tape over both ends securing the ends.
7. Try to slip the paper bracelet over your wrist. It is ok to have to work with it a little. If it does not break you should order that size. If it does break, you can try it again or try the next larger size. If it is too easy to get on then try a size smaller.
8. Questions? Watch the video or call 978.792.2555

Please note:

All bracelets are handmade and might vary a bit in size from the size listed above. If you are deciding between two sizes, we recommend you move up a size. We cannot resize bangles so please be sure of your size before ordering. All sales are final on customized pieces.
